Dear Mr. Nunnemacher:

At the moment I have 8 girls who want to come to row on next Saturday. They will have had only three practices so that I think the race course should be a short one,- about one-third of a mile should be all right, if you approve. We will take the 2:15 train from Boston. What trolley car did you say we take after getting off the train?

If we get there that early could the girls try the shell for a short time before the race, since their practice has been in the barge. They are thrilled at the thought of rowing in your shell.

Do you think we will be finished in time to get the 6:15 train back to Boston?

Sincerely yours,

Harriet L. Clarke
