Assignment – Using scholarly sources

Professor: Acosta-Cruz

Librarian: Rachael Shea

Please perform all of the tasks on this list. Do not work in groups or share answers.

Read all of the instructions first.

Find one book in Goddard on Globalization and Latin America.

1. What is its call number?
2. On what floor would this book be located?
3. What year was it published?

Also:

Find three (3) articles that deal with some aspect of your presentation,

- 1.)which are not from Google and
- 2.)are from at least 2 different databases and
- 3.)are available at Clark.

If the articles aren't exactly perfect for your presentation, that is OK. What I want to know is if you can find 3 scholarly articles that are not directly from Google or Google Scholar.

For each article:

- 1.) Provide a citation in the correct MLA format,
- 2.) list the author and any credentials you can determine
- 3.) describe the intended audience for this article
- 4.) list the database in which you found the article
- 5.) list the format (print or electronic) in which Clark owns this article
- 6.) and if we have it in paper format, what is its call number?

Please list one question or area of trouble that you encountered while doing this assignment.
