Welcome.
At Clark, you’re welcome from the moment you first set foot on campus. Our community is diverse, creative, and intellectually daring, and enriched by the wide variety of backgrounds our students bring. Here, we challenge you to imagine a better world — and then create it.
LEEP, Liberal Education & Effective Practice, is Clark’s approach to experiential learning. Be a part of small, discussion-based classes and then take your knowledge off campus through research, internships, and Problems of Practice (POP) courses.

Education, untethered

“The only way to learn what’s harming the water is to go to the water.”

Biology major Linnea Moon ’19 investigates the impact of pollutants on Walden Pond.
Our undergraduate programs are supported by multiple schools within the University. These specialized schools complement our liberal arts foundation with expert courses, faculty, speakers, and events.

**College of Arts & Sciences**
Most of Clark’s undergraduate majors and minors are housed here, with disciplines as widespread as psychology, urban studies, economics, screen studies, and mathematical biology & bioinformatics.

**School of Management (SOM)**
Focused on business and social innovation, the School of Management is home to programs in management, marketing, and entrepreneurship and innovation. The School of Management is accredited by the Association to Advance Collegiate Schools of Business (AACSB), a distinction that only 5% of undergraduate business programs share. Students in the Arts & Sciences can double-major in these programs, creating an interdisciplinary degree with expert faculty mentorship and hands-on experience in the business world.

**Becker School of Design & Technology (BSDT)**
The Becker School of Design & Technology at Clark was founded in April 2021 to carry on the legacy of Becker College’s world-renowned academic programs in game design, development, and interactive media. Our accredited interactive media major is ranked #2 in the world by The Princeton Review. The major offers five tracks that equip students with differentiating skills: game arts, game design, game development & programming, game production & management, and game audio.

Urban Studies

Our students’ interests are as varied and diverse as they are. Whether you know exactly what you want to study or you’re still exploring, our curriculum gives you time to create your own path.

* After declaring a major, students who wish to choose a minor may do so from either list.
We connect exceptional faculty members with bright students through collaborative work in the classroom, lab, and community. They’ll be your teachers and mentors, helping you navigate this important journey.

Distinguished professors, influential mentors

“At Clark, students have a connection with their professors; they know them, they interact with them, and they work in their labs. You know who they are, and they know your name. It’s not a 300-person class.”
Megan McIntyre ’19

“What I love most about Clark is witnessing the moment when students are set ablaze with intellectual discovery.”
Nicole Overstreet | Assistant Professor, Department of Psychology

94% of faculty hold doctoral or terminal degrees

10 to 1 student-faculty ratio
This Clark team earned top prizes at the Wellesley 2018 hackathon, “WHACK.” They worked around the clock to build apps focusing on some of the world’s toughest challenges, from climate change to mental health.

“I learned to work collaboratively with my team even though none of us knew each other before that weekend. By the end of the weekend, we wanted to go to other hackathons to collaborate again. The connections made, skills learned, and collaboration practiced will help me with my post-college goals.”

— Naomi Geffken ’21
“The skills our student-athletes acquire in their athletic disciplines are lifelong tools they can use in the classroom and in their search for internships and jobs.”

Trish Cronin | Director of Athletics and Recreation

What we’re made of

Clark’s campus is small, but the opportunities to get involved are endless. No matter what your interests, you’ll find your niche in our dynamic, deeply inclusive community.
STUDENT LIFE

0 fraternities & sororities

The Office of Multicultural and First Generation Student Support (MFGSS) serves students of color and students who are the first in their families to attend college. As a direct result of student activism, spaces in Dana Commons were redesigned to create meeting rooms, offices, and community spaces that support identity-based groups and events on campus.

“I remember going (to the craft room) in my first year as a part of the Latin American Student Association (LASO) to create table centerpieces for the Noche Latina event. There were so many materials available for us to use and it was a lovely spot to hang out, listen to music, and build these projects together.”

Community, youth & education studies major Sophia Stewart-Chapman, ’22
Blessed with a rich history and energized by an ambitious vision for its future, Clark’s home in the heart of New England abounds with opportunities to live, learn, and play. New England’s second-largest city, Worcester is a hub for biotech, higher education, health care, and the arts, and is home to a thriving “pop-up” culture featuring concerts, exhibits, and food events. In 2021, the city became home to Polar Park and the minor league Worcester Red Sox. If you want to roam farther, it’s a short ride to Boston and Providence, and about three hours to New York.

Worcester: a city on the rise
No matter what your career goals, gaining experience outside the classroom will help you refine your interests, build skills, and develop your professional network. Today’s employers are hungry for applicants who have proven they can succeed in professional settings. Internships provide the experience you need to stand out.

**Put your knowledge into practice**

“My most memorable moment during my Amazon internship was when my project finally started functioning on its own. It felt like magic once everything started to work together.”

Christian Rentsman ’18

“This was the first experience I had in a health care setting where I was actually seeing patients and talking to them. It was very reassuring as it made me realize that patient care is something I enjoy and can do well.”

Alaina Tabani ’20 | UMass Medical School Intern

100% of Clark students complete an internship or experiential learning opportunity.
Clark’s Accelerated B.A./Master’s Program gives qualifying undergraduates the opportunity to earn an advanced degree in five years. You’ll take graduate-level courses during your senior year, fulfilling some of the requirements of your master’s degree. The best part? Most fifth-year master’s programs are offered tuition-free.

Earn your master’s tuition-free

Quincy Milton III ’20 conducts research on the Massachusetts coastline while earning his master’s in biology through Clark’s tuition-free fifth-year program. He’s planning a career in environmental consulting.
Our alumni succeed in the world because they spend four powerful years discovering how to change it for the better. As a Clark graduate, you’ll be poised for a life of purpose and integrity whether you attend graduate school, land a job at a dynamic company, or launch your own venture.

Engaged citizens of the world

A Clark education prepares students to move confidently and thoughtfully through the world. Once they earn a diploma, our graduates thrive as business leaders, educators, activists, entrepreneurs, and researchers.

“...What I really respect and value about my time at Clark was that the school focused on empowering students to explore and not be fixated on any rigid form of analysis, but really to be open to the world around them. Clark wasn’t what was important — the student was important.”

Jeffrey Lurie ’73 | Owner of the Philadelphia Eagles

98% of Clark grads are employed, in graduate school, or in service six months after graduation.
A Clark education is an investment in your future

"Attending Clark is an opportunity unlike any other, and we are committed to making our educational experience attainable through a combination of need- and merit-based financial support. Our goal is to provide access to a diverse community of students without regard to socio-economic status, race, gender, geography, or any other factor outside of their academic preparation, curiosity, motivation, and willingness to be a positive contributor."
